**\*\* NOW \*\*** Printing options of up to 2 inches with corresponding accessories • *jetStamp 1025* with integrated measuring device • Available sensors: Barcode Scanner, V24-RS232 sensor adapter cable • Max. print size: 85 x 52 mm (W x H) = 2 inch with corresponding accessories

### **MEASUREMENT DOCUMENTATION from a single source**

The 'sense' makes the difference! In addition to the basic *jetStamp 1025* model, REINER® offers an additional device solution for mobile measuring tasks and their immediate documentation as direct printing.

The *jetStamp 1025 sense* model offers maximum flexibility in the documentation of measured values. This model works without external, additional measuring devices. The required sensor ([barcode scanner](#), [V24-RS232 sensor adapter cable](#)) is connected directly to the device. The *jetStamp 1025 sense* is therefore a closed measuring device with an integrated printer.

The recorded measured value can be printed directly and repeatedly on documents and other surfaces at the measuring location. The measurement results are documented immediately and therefore always remain tangible, visible and permanently traceable.

**REINER® offers various accessories for the *jetStamp 1025 sense*, see [accessories](#).**

Expand your possibilities and print larger impressions with maximum precision!

- Various measuring tasks with a single measuring device
- Available sensors: Barcode Scanner, V24-RS232 sensor adapter cable
- 100% mobile
- Max. print size: 85 x 52 mm (W x H) = 2 inch with corresponding accessories
